

## Jaishal Plastics

Leader In Manufacturing Cistern And  
Seat Cover Since 1998.

# Jaishal Plastics

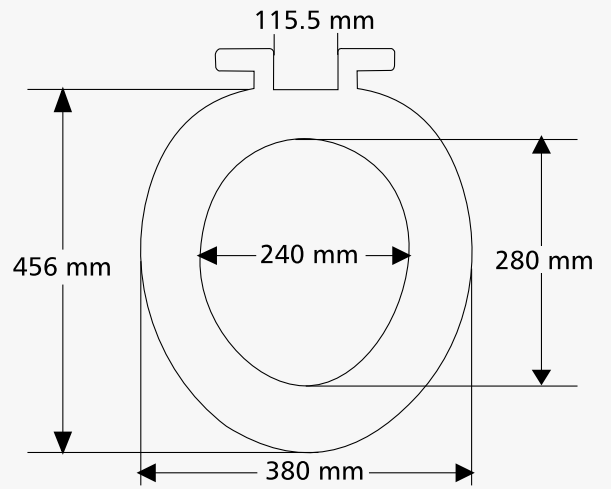

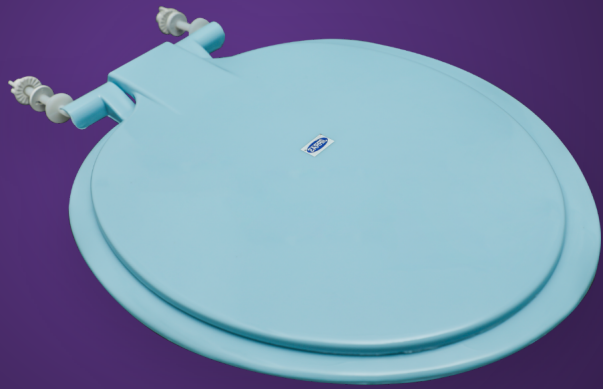

---

## About Us

Our company's founder, Ishwar Bansal, a businessman and a visionary person. In 1996, He founded Jaishal Plastics in Mumbai city. At the initial stage, Jaishal Plastics has started with the single and unique model of the toilet seat cover. After successful delivery of a couple of orders between 1996-1998, we understood market more in depth and there was a need for variation in a model due to demand and culture. We took this challenge and introduced more variations and qualities in toilet seat covers.

few years later, Jaishal Plastics took a production in its line to improve the quality of the products with customization. Today, It has covered national and international market by manufacturing toilet seat covers. Our production unit is well equipped with advanced machinery and the whole infrastructure consists of many departments such as Manufacturing, Quality control, R&D, Warehouse, Designers and others.

Our products are cost effective and widely used in domestic market. With vast industrial experience and deep product knowledge, we keep on introducing a technically precise range of products for toilet seat covers at a competitive price.
